

Fridge Friend - Sprint 1

Share

User Stories Task

1.1: As a user, I want to manually add items to my fridge list with expiration dates

1.2: As a user, I want to scan receipts to auto-fill name and shelf life.

2.1: As a user, I want to receive reminders when items are nearing expiration.

1.2 (NEW): As a user, I want to scan products to auto-fill name and shelf life.

To-DO

✓ 1 raymon - have user input to take in an item and have it updated to the supabase

✓ 1 ashwin and mukesh - receipt photo scanner / photo upload of item to get general information on item bought

✓ 1 atharv - frontend skeleton

✓ 2 raymon - manual user expiration input and have reminders reoccur as current date approaches expiration date

✓ 1.2 (NEW) ashwin and mukesh - item photo scanner to extract name, be able to modify after

Problems with Tasks

1.2: Many inconsistencies with receipt scanning

1.2: Scanner is functional but not good enough for an MVP, will be pivoting to the new 1.2
